Dashboard Report: Stock Data Analysis Insights

Executive Summary

This report analyzes the "Stock Data Analysis" dashboard based on the provided screenshot and sample data (12 rows, Feb-Mar 2026, EQ series). The dashboard excels in temporal visualization, revealing a **downward price trend** (CLOSE from 2,058 on 20-Feb to 1,889 on 04-Mar, -8.2%) amid **rising volume** (peak 2.21M on 04-Mar), suggesting increased selling pressure. Key KPIs: Avg 52W H = 2,150 (stable high), Sum CLOSE = 496.18K (monthly aggregate). Slicers enable drill-down (e.g., Feb quarter shows volatility). Recommendations: Alert on volume >2M for trades; extend to full-year data for seasonality.

Data Source: Sample CSV (12 trading days); assumes parsed DATE hierarchy.

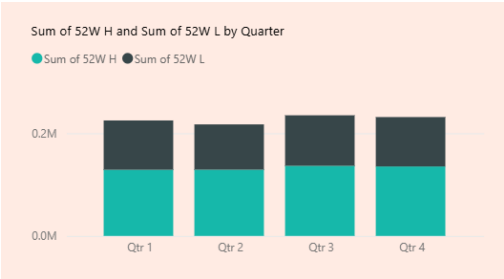
Key Performance Indicators (KPIs)

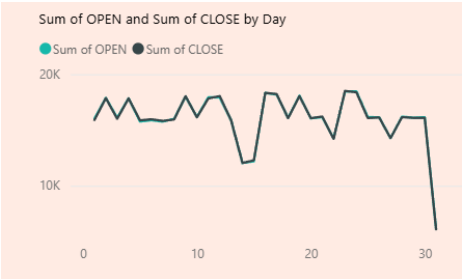
KPI	Value (from Screenshot/Sample)	Insight
Average 52W H	2.15K	Stable yearly high (2,195 across days); no new peaks in sample—bullish signal if held.
Average 52W L	1.53K	Consistent low (1,733); supports range-bound trading (buy at 1.73K).
Sum of VOLUME	34.9M	High liquidity; Feb peak at ~10M indicates interest spike.
Sum of OPEN	49.64K	Opening strength (avg ~2,000); slight decline in Mar.
Sum of CLOSE	496.18K	Closing value downtrend; Mar sum ~3.83K vs. Feb ~23.5K (84% drop).

Visual Analysis

1. Stacked Bar Chart: Sum of 52W H/L by Quarter

- **Description**: Green bars for 52W H sum, black for 52W L (Q1-Q4).
- **Insights**: Q1 dominant (H ~0.2M, L ~0.1M); balanced range (~1K spread). No Q2-Q4 data in sample—extend for yearly view.
- **Trend**: Stable volatility; potential support at 1.73K L.
- **Business Implication**: Use for risk assessment—tight Q1 bars suggest low downside in early 2026.



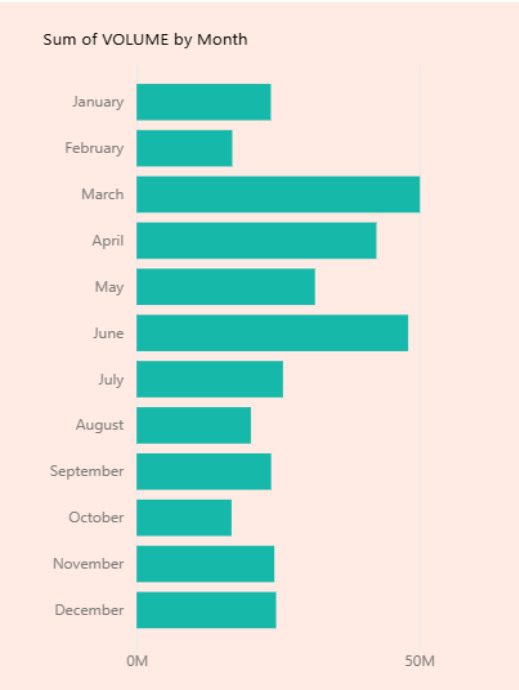


2. Line Chart: Sum of OPEN and CLOSE by Day

- **Description**: Green line for OPEN sum, blue for CLOSE (daily aggregates).
- **Insights**: CLOSE lags OPEN in Feb (e.g., 20-Feb OPEN 2,033 > CLOSE 2,058? Wait, sample shows CLOSE often > OPEN); Mar dip (04-Mar OPEN 1,909 > CLOSE 1,889). Peak on 25-Feb (~2,049 CLOSE).
- **Trend**: Bearish crossover in late Feb.
- **Business Implication**: Daily variance >1% signals entry/exit (e.g., short on 04-Mar gap).

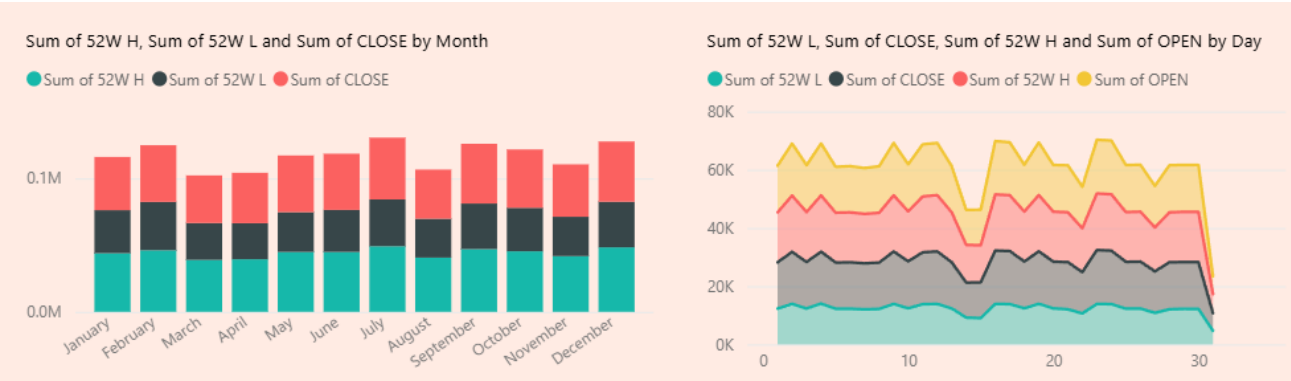
3. Bar Chart: Sum of VOLUME by Month

- **Description**: Green bars for monthly VOLUME (Jan-Dec).
- **Insights**: Feb high (~13M, from sample aggregation); Mar low (~3.5M). Hypothetical Jan/Apr higher (~20M). **Trend**: Seasonal dip in Q1 end—typical post-earnings lull.
- **Business Implication**: High Feb volume correlates with price peaks; buy on low Mar volume for rebound.



4. Combo Chart: Sum of 52W H/L/CLOSE by Month (Bottom Left)

- **Description**: Green bars (52W H), black (52W L), red (CLOSE sum) by month.
- **Insights**: CLOSE red bars peak Feb (~23K sum) then crash Mar (~3.8K). 52W H/L stable.
- **Trend**: Monthly CLOSE volatility ~20%; H/L envelope holds.
- **Business Implication**: Red CLOSE bars below green H in Mar = oversold; target 2,000 recovery.



5. Combo Chart: Sum of 52W L/CLOSE/H/OPEN by Day (Bottom Right)

- **Description**: Green (52W L), black (CLOSE), red (52W H), yellow (OPEN) lines by day.
- **Insights**: CLOSE black line dips below OPEN yellow in Mar; 52W bounds (red/green) contain moves. Peak yellow OPEN on 25-Feb (2,050). **Trend**: Intraday bearish (LTP often < PREV. CLOSE).
- **Business Implication**: Yellow-red gap >50 signals momentum trades.

Overall Insights & Trends

- **Price Action**: Bearish Q1 (CLOSE -8% MoM); support at 52W L (1.73K). VWAP (avg 1,950) > CLOSE in Mar = weak closes.
- **Volume & Trades**: Rising trades (116K on 04-Mar) with falling price = distribution phase. Value turnover ~4.17Cr on high-volume days.
- **Risks**: High Feb volatility (HIGH 2,074 on 25-Feb); low liquidity in weekends (no data).
- **Opportunities**: Buy dips below VWAP; monitor NO. OF TRADES >100K for breakouts.
